

Mace, Baking Powder and Coffee meets State food law in all its requirements.

John Peterson, State Food Commissioner.

Americanization of England.
Twenty years ago the English hated everything that was American. We now think altogether differently. The American woman is the pattern upon which our women are being remodeled; the American man has wholly altered our character and that of our business. British institutions are being reconstructed in accordance with those of the United States.—Truth, London.

Johnny Jones' Latin.
One day at Latin recitation Johnny Jones was so drowsy that when the professor asked for the conjugation of a certain verb he failed to catch it, and turning to his bosom friend inquired: "What verb?" "Dumfno," whispered his classmate. "Dumfno, dumfno, dumfno," said Johnny Jones to the horrified professor.—Lippincott's Magazine.

We Make Travel Easy.
Five trains daily via the Atchison, Topeka & Santa Fe, Colorado to Kansas City, St. Joe, Chicago, Galveston, El Paso, City of Mexico. Ask me about reduced rates. C. F. Warren, C. A. A. T. & S. F. Ry., 411 Dooly Block, Salt Lake City, Utah.

Onion Sandwich.
Cut two thin slices of white bread firm enough not to crumble, spread with fresh butter and lay on one side onion thinly sliced and macerated in oil and vinegar for ten minutes. Put on the top slice, press firmly together and cut in four little squares. One may eat all four in the chase of sleep, or as a lunch. Sometimes one square brings sleep.

Investment Worthy Investigation

Money put in the bank brings a low rate of interest, but is generally safe. There are, however, other investments equally as safe and more productive. We list a full line of the following "stocks," and recommend them to your notice, firmly believing that as a security giving adequate results to the investor they cannot be equalled.

McMurrin growers, binders, headers, reapers and rakes.
National Harvesters and Red Tag binders and rakes.
Crown Separators.
Meyer & Hoo, and Red Jacket pumps.
Bain & Cooper Wagons.

1. H. Co. gasoline engines for all purposes.
2. H. Co. gasoline spreaders, different sizes. The best on earth. Demonstrations made.
3. Case threshing machines, engines and horse-powers.

The most complete line of light vehicles offered at any point west of Chicago.
"Kambler" automobiles, demonstrated for durability, speed and hill climbing propensities.

The farmer, rancher, stock-raiser and the public generally are invited to inspect our line of "stocks" at Salt Lake City, Ogden and Logan, Utah, Idaho Falls and Montpelier, Idaho, and at the thirty additional stores we have located at different points in Utah, Idaho, Wyoming and Nevada.
Correspondence addressed to the above points nearest located to your residence or shipping point incurs quick reply.
Our general office at Salt Lake City will be closed at 1 p. m. Saturdays from now until Sept. 10, inclusive, owing to the fact that railroads will not receive freight after that hour.
Sundays and holidays during the harvest season a force of men are at work from 10 a. m. until 1 p. m. filling orders for machine extras. Telephone no. independent 120 and 165, Bell 165, during the hours named.
Attention on the premises nightly.

J. V. SAGLER, SALT LAKE CITY, UTAH

Boarding and Day School for Boys. Situated in the heart of the Rocky Mountain district, nearly one mile above sea level, it enjoys an unsurpassed climate. Buildings modern, steam heated and electric lighted. Hot and cold baths. The institution claims to give most thorough courses in classical, scientific and commercial branches, conferring degrees in the same. Inspection of chemical and physical laboratories invited. A fine museum and mineralogy department. Separate care of little boys by a competent master. Gymnasium of the best. Indoor games during winter season. Compulsory military drill under the direction of an army officer. Music of every kind taught. The band and orchestra being special features of the college. Private training for desirable students, outside of regular school hours, in Higher Mathematics, Chemistry, Mineralogy, Assaying, etc., and also in Commercial subjects. Terms moderate.
Apply for full Year Book and other particulars to The Rev. President.

Odd Origin of Custom.
In Abyssinia the emperor is commonly called "Jan boy," meaning "his majesty." The words have a strange history. It is given by a passage in the chronicle of Mahdara Maryam. The King Sarka Dengel while engaged in a military expedition camped in Dambya, was surprised to hear the inhabitants shout "Jan boy," which means "Hi, elephant!" at an elephant which was destroying a field of corn, and fled when thus accosted. Then the king said that whenever he went to pillage corn, if the people cried "Jan boy!" he would consider their claims and redress their wrongs. From this arose the custom of addressing the king as "Jan boy," as an equivalent for asking for justice, the expression gradually losing its special significance and becoming the ordinary term of address when speaking of his majesty.

MAKES STEP IN ADVANCE.

All Hallows College Secures Services of Crack Athlete and Student.

Salt Lake City.—At the close of All Hallows college in June Captain Freeman Bassett, instructor in athletics and Charles J. Savage, a member of the technical staff, resigned. Father Guinan, who has just returned from an extensive tour of Colorado, announces that he has secured, in the person of John F. Tobin, a successor to these men who combines both the qualities of a teacher and athletic director. All the athletic work at the college will be placed under his direction next year, and the outlook for the finest class teams in football, baseball and on the field and track is more encouraging than ever. Mr. Tobin has made a great record in the past, being one of Chicago's foremost athletes. Last fall he remained out of college and coached the football team of Tulane university at New Orleans.

Speaking more especially of Mr. Tobin's acquisitions as a student, Father Guinan of the All Hallows college, says:
"But it is not as an athletic man alone that he excels. He is likewise a brilliant scholar. He is naturally mathematically inclined, and has gone through an extensive course in algebra, geometry, trigonometry (plane and spherical), calculus (integral and differential). He was at the head of the Chicago Debating society, with the organization and conducting of which he is thoroughly conversant. In history and literature he is A-1. In fact, they do not conceal the fact at the university that he is one of their very distinguished students."

What is a Gentleman?
Among the Persians at the time of Cyrus the boys were taught to ride, to speak the truth and to draw the bow. That meant manliness, truthfulness and courage, all essential to the character of a gentleman. The knights of chivalry, who were the gentlemen of their time, added the duty of rescuing the oppressed and distressed and this completed the ideal by teaching unselfishness and service. If a boy is taught to be always self-respecting, courageous and truthful and invariably considerate, not outwardly but as the expression of true kindness of spirit, of the rights and feelings of others, he will grow up, whether he be rich or poor, a professional man or a laborer to have the right to claim not only artificial distinction, but in his own right, all that it implies, "the grand old name of gentleman."

All Doubtful.
"Dat was a great wedding, Sam."
"Deed it was."
"Well, who was de lucky man?"
"Dat's hard to say. De groom thought he was de lucky man till he squinted et de bride and foun' out she had wrinkles lak a weddeh map."

"Huh!"
"Den de best man thought he was de lucky man till he foun' out de rabbit's foot de groom had gibben him was er cat's foot."

"Lan's! Den de preacher mns' hab been de lucky man?"
"Well he kinder puffed up det way till arthe de ceremony en den he dis-cobehed det de dollar de groom had passed him es a fee was lead."

Whisky for the Commons.
A bountiful supply of Scotch whisky is always provided for the British house of commons. For the 679 members a vat of 800 gallons especially distilled for them is always at hand. Its contents are never permitted to fall below a certain level. It is refilled two or three times in a session.

Crocodile Emblem of Luck.
An emblem of good luck, a stuffed crocodile, is found in many of the houses and over doors and gateways in Cairo. The idea conveyed by the custom is similar to our own horse shoe.

A HISTORIC MANSION

BIRTHPLACE OF MARTHA WASHINGTON STILL STANDING.

Situated Near West Point, Va., and in Good State of Repair—A Popular Place for Relic Hunters.

West Point, Va.—Chestnut Grove, the birthplace of Martha Dandridge, who married first Daniel Parke Custis and then Col. George Washington, is only a short journey from West Point. It is situated in New Kent county, about five miles from the county seat, on the banks of the Pamunkey river. The old mansion, in which Mrs. Washington first saw the light, is standing to-day, and by the nails, lumber and style of construction, extreme age is attested.

Col. R. P. Cook, who was born in New Kent, near Chestnut Grove (the Dandridge homestead), October 10, 1813, and who purchased the property and lived on it 50 years, said that his grandmother, who was Miss Ann K. Chamberlayne, sister of Gen. William Chamberlayne, and a schoolmate of Martha Dandridge (Mrs. Gen. Washington) told him that she did not know when the house was built, and had no acquaintance with anyone who knew.

The building is a two-story frame structure, the walls resting on a brick basement which is five feet below the surface of the ground and four feet above ground, and 18 inches thick, save at the bases of the two chimneys, each of which is five by six feet, with an arch in the basement six feet high, four feet wide and five feet deep.

The lumber in the frame is white oak, the doors and window casings are of poplar, and the weather boarding is of heart pine. The nails were originally all hand made. Several years ago it was found necessary to replace many of the nails, for the sake of safety, as so many nails had been drawn out and taken away as souvenirs or relics by tourists.

The length of the basement walls is 58 feet, with 22 feet, and many sumptuous banquets have been served therein.

The rooms on the first floor are ten feet high, 20 feet wide, and 18 feet long.

The reception hall is 12 by 20 feet. On the place is a large burying ground, containing the graves of the Dandridges and many noted people of the long ago. A large vault remained there for many years, built of imported brick. The bricks were afterward used to build a chimney. On the site of the vault thousands of walnut trees sprung up, and many canes and other souvenirs have been cut and fashioned and carried away by relic hunters.

The place is now owned by Mrs. M. C. Smith, of Newport News, and is occupied by Mr. O. M. Chandler and family. Mrs. Chandler is a daughter of Mrs. Smith.

The house fronts north to the Pamunkey river, and also fronts to the south. Sloping from the house to the river is a terraced garden, filled with many beautiful flowers and old-time shrubs, among others the caryanthus, with its delicate fragrance. Out in the river, in front of the house, is a small island known as "Cock's Island." During the civil war gunboats were sunk on either side of the island to blockade the course to Richmond.

The name Chestnut Grove was given on account of the many fine chestnut trees abounding on the farm.

While Martha Dandridge was the wife of Daniel Parke Custis she lived at the White House, the site of which can be seen from the Southern railroad, running between West Point and Richmond. Tradition says that the presidential mansion in Washington, D. C., was named from the home of Mrs. Custis, afterward Mrs. Washington, wife of the first president of the United States.

WRECKS FAMOUS RELIC.
Owner Destroys "Painted Rock," a Historic Indian Boulder, to Be Rid of Crows It Drew.

Washington, Pa.—"Painted Rock," a historical boulder which stood on the top of a hill overlooking the Mopongahela river, near Millsboro, was blown up by dynamite by Joseph Horner, upon whose farm the stone was located. Horner destroyed the rock because he was annoyed by the thousands of persons which it attracted to his farm each year. The boulder was in the shape of an altar, and had been carved by the Indians with figures of men, bears, wolves, snakes and, strangest of all, a kangaroo. For more than 100 years it has been considered one of the most important remains of the written characters of the North American Indians. Columns have been published about it from the pens of eminent scientists and historians.

Poison Reunites Couple.
Logansport, Ind.—The two-year-old son of Mr. and Mrs. Charles Tolman is in a critical condition from eating paris green. Mrs. Tolman has divorce proceedings pending and was absent from home interviewing her lawyer. It was two hours before she was found and medical assistance secured, but there is a possibility of the child recovering. As a result of the accident, however, the father and mother were again brought together and a partial reconciliation was effected. The divorce proceedings will be dropped.

A PROFESSOR OF FLEAS.

Odd Profession of Some Persons in France—Troubles of One of the Impresarios.

London.—Among the curious professions which one meets with in this country from time to time is that of professor of fleas. What the professor trains his alert pupils to do I cannot imagine, writes the Paris correspondent of the London Globe, but every now and then at the shows which camp on the outskirts of Paris the flea professor has his booth.

One of these strange impresarios named Jocolino lately took up his residence in a lodging house in the Rue St. Charles. Unfortunately Jocolino's pupils multiplied with far more rapidity than he could train them to be well behaved, with the result that their active disposition led them to explore the adjoining rooms of the lodging house, where they performed on their own account.

Their visits were not to the liking of the neighbors, and Jocolino was obliged to listen to some very forcible remonstrances on the subject. The nuisance, however, did not abate, and finally one of the tenants, a plumber named Savvin, decided to take the matter into his own hands. Armed with a large quantity of insect powder, the irate plumber entered Jocolino's room in the absence of the professor and sprinkled the exterminator in all directions.

While he was so engaged, however, the flea trainer returned and, mistaking the plumber for a burglar, seized a revolver and shot him in the head. Savvin is now lying in a hospital and the trainer of the lively flea is in the hands of the police.

HARPER A JOLLY COLLEGE

School Chum of Late University President Tells of "Smoking Out" Shy Bridal Couple.

Newark, O.—In the little college town of New Concord, O., William R. Harper and Frank Dennis were boyhood chums and college companions. The one became principal of the Granville (O.) academy and later president of the great University of Chicago while the other for the past 30 years has been a trusted engineer in the Baltimore & Ohio railway service.

Mr. Dennis, who paid a visit to Newark the other day, told of his college career with President Harper.

Mr. Dennis said that a friend of Harper and himself was married and as was customary in those days, a "belling" was arranged. A big party assembled at the bride's home near New Concord, but nothing could induce the newly married couple to appear before the crowd until Harper suggested they be smoked out. Harper and Dennis started to climb to the roof to cover the chimney with a board when, to their horror, the top of the chimney fell. This brought out the bride's father, who, after learning that no special damage had been done, invited the young folks into the house for refreshments.

All was thought to be well until the next day the girl's father entered a justice's court and had Harper and Dennis arrested. It cost each of them \$7.50. It seems that Dennis and Harper were the only two boys in the crowd whom the man had recognized.

BOLL WEEVIL IS TOUGH.

Experiments Show That One Has Gone Two Whole Months Without Food.

Baton Rouge, La.—Experiments with the boll weevil that show the promptness with which the pest adapts itself to climatic conditions are being conducted by the crop pest commission in the weevil cages near Keatchie. Some of the weevils have been marked and those that were known to live long in Texas without food have gone several months.

The crop pest commission now has in one of the cages a weevil that has gone as long as two months without a thing to eat. The experiments at Keatchie are being conducted with great success. These are the first experiments ever conducted with the boll weevil, and gratifying success has so far attended the results.

Data of great value of entomologists that will be of supreme importance in fighting the weevil have already been secured, and the experiments have only begun. They will be carried forward under the direction of William Newell, entomologist of the crop pest commission, until the close of the cotton season.

Building to Be 625 Feet High.

New York.—The highest building in America is to be erected soon at the corner of Liberty street and Broadway, according to the plans of Ernest Flagg, architect, for the Singer Manufacturing company. Work on the reconstruction of the present Singer building into a 14-story office building with a tower of 41 stories, 625 feet high, is to be begun as soon as the plans are approved by Building Superintendent Murphy.

One Powder for Two Uses.

Washington.—An effort is being made by the navy and army to reach an agreement on powder, that supplies for one may be used by the other. It often happens the army has a large supply and the navy is short.

Eruption Creates an Island.

Oakland, Cal.—Word has reached here that a new island has been brought into existence near Boroslor Island, Alaska, by a great submarine eruption.

FOUR YEARS OF AGONY.

Whole Foot Nothing But Proud Flesh—Had to Use Crutches—"Cuticura Remedies the Best on Earth."

"In the year 1899 the side of my right foot was cut off from the little toe down to the heel, and the physician who had charge of me was trying to sew up the side of my foot, but with no success. At last my whole foot and way up above my calf was nothing but proud flesh. I suffered untold agonies for four years, and tried different physicians and all kinds of ointments. I could walk only with crutches. In two weeks afterwards I saw a change in my limb. Then I began using Cuticura Soap and Ointment often during the day, and kept it up for seven months, when my limb was healed up just the same as if I never had trouble. It is eight months now since I stopped using Cuticura Remedies, the best on God's earth. I am working at the present day after five years of suffering. The cost of Cuticura Ointment and Soap was only \$6, but the doctors' bills were more like \$600. John M. Lloyd, 718 S. Arch Ave., Alliance, Ohio, June 27, 1905."

Iodine a Cure for Snake Bite.
For a sure cure for snake bite, take about seven drops of iodine, scarify and bathe the wound also with iodine. This remedy was first used by a medical officer in British service in India. It has cured both man and a number of animals; it never fails; it is really wonderful in its effects. One instance I will relate. A young man working for me in the harvest field was bitten by a very large rattlesnake on one of his large toes. I gave him about seven drops of tincture of iodine on a little sugar, and to make doubly sure repeated the dose an hour later. His foot swelled, but next morning he was all right. I have had animals whose bodies have swelled considerably, but all have recovered from the bite.—Topeka Capital.

Rich Oil Fields of Africa.
The oil fields near Delagoa bay, in Africa, are expected to prove among the most productive in the world.

DODD'S KIDNEY PILLS
FOR ALL KIDNEY DISEASES
CURES RHEUMATISM, BRIGTH'S DISEASE, DIABETES, BACKACHE, GRAVEL, NEURALGIA, MIGRAINE, ETC.
The public will find it impossible to resist the temptation of purchasing this medicine, sold only in packages of 10 pills.

LAND SCRIP
Approved Forest Reserve and Railroad Scrip for surveyed, unsurveyed, timbered or prairie land; approved United States Military Bounty Land Warrants; Recertified Soldiers' Additional Scrip; all kinds of Land Scrip bought and sold. H. M. HAMILTON, The Portland, Portland, Oregon.

Nothing Succeeds Like "EGG-O-SEE."

The man who preaches the best sermon; the man who tells the funniest stories; the man who keeps the best store; or the man who makes the best goods soon finds that people come to him. Merit is the best advertisement in the world. People speak well of things they know are good. They pass the good word along.

The best breakfast food is EGG-O-SEE, for it contains all the life-giving properties of nature's best food, which is wheat.

EGG-O-SEE is deeply in debt to the thousands of wives and mothers who use it in their homes, for these good women tell their neighbors about this great food.

Children and aged persons alike are friends of EGG-O-SEE. Merit and common sense are the things that advertise EGG-O-SEE most. EGG-O-SEE is cheap. A 10-cent package contains ten liberal breakfasts. EGG-O-SEE is sold everywhere. Grocers must keep it if they want to keep their good customers, for good customers insist on buying EGG-O-SEE.

The fact that no preparation, no cooking is required, makes EGG-O-SEE very popular. Open the package; put as much as you like in a dish; pour on milk or cream and eat. It is delicious. It is wholesome. It makes you strong.

A lot of interesting facts about EGG-O-SEE have been published in book form entitled, "Back to Nature." This book also has a course of physical culture—fully illustrated. Anyone wishing this book will receive it free by addressing EGG-O-SEE Company, 10 First St., Quincy, Ill.

Two Profitable Postal Systems.
Next to Great Britain, Russia has the most profitable postal system, which nets over \$20,000,000 a year.
